**Subject:** INTACT E-newsletter Issue No. 60

**Hello INTACT members!    Bienvenue chers membres INTACT مرحباً بأعضاء شبكة "INTACT "**

**"The Sustainable Development Goals contain a specific target calling for an end to FGM. When this practice is fully abandoned, positive effects will reverberate across societies as girls and women reclaim their health, human rights and vast potential." — UN Secretary-General**

### English News

**200 million women and girls live with female genital mutilation, says U.N.**

They covered her face and laid her down. What happened next, Agnes wishes no girl would ever experience. [More...](#)

**Unicef Report Finds Female Genital Cutting to Be Common in Indonesia**

Female genital cutting has always been seen as an ancient ritual practiced in Africa and to a lesser extent in the Middle East, but a new global assessment documents for the first time that it is widespread in one of the most populous countries in Asia: Indonesia, where almost half the women are estimated to have undergone it. [More...](#)

**Female Genital Mutilation footmark in south of Iran**

The International Network to Analyze, Communicate and Transform the Campaign against FGM/C (INTACT), is an international group of researchers, scholars, and activists committed to bringing scientific evidence to bear on the campaign to end FGM/C. INTACT serves as a forum for FGM/C debate and helps bridge gaps in knowledge and information relevant to FGM/C on the local and the international levels. INTACT helps communicate lessons learned, disseminate research, and promotes the utilization of research findings to assist in the campaign against FGM/C. INTACT is managed by the Population Council.
