The time is now: A call to end female genital mutilation, child marriage and son selection by 2030

"When I was 12-years old, my family organized a ceremony to transition my sisters and myself to become women," says Kakenya Ntaiya, a member of Kenya's Maasai tribe. "I was first because I was the oldest. I was told to open my knees, so I opened them." [More...](#)

Ebola Ended FGM in Sierra Leone, but Now It's Back

The memory of Ebola hangs heavy over Sierra Leone's rambling capital, Freetown. Old billboards reading "stop touching sick persons" loom above highways, body temperature checks remain obligatory at office entrances, and thousands of people continue to mourn the loved ones they lost during the 18-month-long epidemic that ended late last year. [More...](#)

The International Network to Analyze, Communicate and Transform the Campaign against FGM/C (INTACT), is an international group of researchers, scholars, and activists committed to bringing scientific evidence to bear on the campaign to end FGM/C. INTACT serves as a forum for FGM/C debate and helps bridge gaps in knowledge and information relevant to FGM/C on the local and the international levels. INTACT helps communicate lessons learned, disseminate research, and promotes the utilization of research findings to assist in the campaign against FGM/C. INTACT is managed by the Population Council.
